Education

2010 **PhD Mechanical Engineering**, _University of California, Berkeley_.

2006 **MSc Mechanical Engineering**, _University of California, Berkeley_.

1999 **BSc Mechanical Engineering**, _Stanford University_.

PhD Dissertation

title _Design of Minimally Actuated Legged Milli-Robots Using Compliant Mechanisms and Folding_

supervisor Ronald Fearing

description Designed and developed a process for scaled prototyping of millimeter scale robots (millirobots) that uses origami-style folding techniques, compliant flexure hinges, and parallel kinematic mechanisms. Proposed collapsing a formulation of equivalent mechanism compliance to a single strain energy-based scalar metric using screw theory to predict mechanism performance. Demonstrated two legged robot designs - a millimeter scale (2.4g), quasi-static hexapedal robot and another scale prototype dynamic legged robot capable of running approximately 14 body-lengths per second.

Master's thesis

title _Design, Prototyping, and Testing of a Low Cost 2 Axis Micropositioning Stage Using Compliant Mechanisms_

supervisor Ronald Fearing

description Designed, fabricated, and characterized an ultra low-cost micropositioning stage based on large displacement compliant mechanisms. Combining the stage with a commercial, off-the-shelf digital microscope camera enabled calibration and visual servoing using computer vision techniques. The stage demonstrated sub-100μm resolution.

Postdoctoral Experience

2010 **Postdoctoral Researcher**, _University of California, Berkeley_.
Developed embedded software for sensing, control, planning, and wireless communication on a 5.5g centimeter scale, power-autonomous legged robot.

Teaching Experience

2016 **Design Nature (ENGR1200)**, We take nature, an important source of inspiration and understanding, as a theme and develop bioinspired ideas into functional prototypes. Our focus is on the general principles and methods that shape the practice of engineering design. Students complete individual and team projects in a studio environment where we seek to develop a shared practice and understanding of engineering design. Students also gain experience in visualization, experimentation, estimation, fabrication, and presentation as they relate to designing.

2015, 2016 **Products and Markets (AHSE1515)**, The aim of this course is to give students a set of learning experiences focused on the engaging in creative enterprise for the good of the world. By pursuing the creation of real enterprises, students will gain an understanding of the role that business and entrepreneurship play in realizing change. The course places a focus on identifying opportunities provided by an entrepreneurial framework, the role of entrepreneurship in pursuing value, and the routes to making change in the world. In this course students strive to create real enterprises. They learn to imagine personally relevant ways to create value for others, develop focused hypotheses about these value propositions, devise experiments to test these hypotheses, and use this learning to evolve and realize their vision.

2014 - 2016 **Elecanisms (Mechatronics) (ENGR3199)**, This course involves the synergistic integration of mechanical engineering with electronics and intelligent computer control in the design of products. In this course, we develop topics critical to the engineering of modern mechatronic systems including electromechanical actuators (e.g., DC motors, stepper motors, solenoids, etc.), practical electronics design including interfacing sensors and actuators to embedded processors, and embedded software design in the C programming language. During the first part of the course, students work in small groups on a series of miniprojects to gain experience with course concepts and develop core engineering competencies. During the second part of the course, students work in teams of 4-5 to engineer a mechatronic penny arcade game to be played by hundreds of visitors to Olin's end-of-semester event, Olin Expo.

2012 **Dynamics (ENGR2340)**, A required course for all mechanical engineering majors at Olin, this course covers topics in kinematics and dynamics of particles and rigid bodies as well as linear dynamical systems. Students learn to formulate and solve equations of motion for particles, rigid bodies, and systems of each. A significant portion of the course is devoted to numerical simulation of equations of motion and visualization applied to problems like determining stable parameters for a model of legged locomotion or chaotic parameters and initial conditions for simple but rich systems like the double pendulum.

2011-2014 **Senior Capstone Program in Engineering (ENGR4190)**, SCOPE is a year-long senior capstone project in which a team of five to six undergraduate students and a faculty advisor work with an industry sponsor to deliver a solution to a real world engineering problem. Students perform all aspects of the project including budgeting, managing interactions with the sponsor liaison, project planning and schedule development, technical work, and written and oral communication of results.
Teams Advised:
- **MIT Lincoln Laboratory (2011 - 2012)** - "A Hybrid Aerial Underwater Vehicle"
- **Ariens (2012 - 2013)** - "Traction Control Systems for Commercial Lawn Mowers"
- **Brandeis University (2013-2014)** - "Rapid Prototyping Microfluidic Foil Chips"

2011, 2013, 2014 **Introduction to Mechanical Prototyping (ENGR2330)**, An elective course available and accessible to all Olin, Babson, and Wellesley students. The course is an introduction to the design and physical prototyping of mechanical systems of moderate complexity. Students get experience communicating mechanical designs using 3-dimensional models in computer-aided design (CAD) software as well as traditional 2-dimensional engineering drawings. Throughout the course, students complete a series of hands-on projects designed to provide them with experience prototyping machines and mechanisms in materials ranging from foamcore and plywood to sheet metal and 3-D printed polymers. Sample work can be found online at http://mechproto.olin.edu.

2011, 2012, 2014, 2015 **Principles of Engineering (ENGR2210)**, A sophomore level course required for all Olin students in which they're introduced to mechatronic systems. Topics covered include programming Arduino microcontrollers in the C/C++ programming language, interfacing with additional hardware such as motors, sensors, and a host computer. Students complete projects comprising a combination of non-trivial mechanical, electrical, and software systems in groups of two to five. The course is exclusively hands-on and includes very few lectures and no required text. Sample projects from past offerings can be found at http://poe.olin.edu.

2011 **Controls - Theory and Practice (ENGR3370)**, Junior/senior level elective course introducing fundamental concepts in modeling and control of single-input, single-output (SISO) linear, time-invariant (LTI) systems. Topics covered include state space modeling of linear dynamical systems, Laplace transforms, root locus, Bode plots, frequency domain analysis, and PID and lead-lag controller design techniques. Students complete a group project that includes the implementation of a control strategy on hardware of their choice at the end of the class.

Teaching experiences prior to Olin College

2007 **Graduate Student Instructor - E28 Introduction to Engineering Graphics**, *University of California, Berkeley*.

2006, 2007 **Graduate Student Mentor - Summer Undergraduate Program in Engineering Research at Berkeley (SUPERB)**, *University of California, Berkeley*.

2006 **Graduate Student Mentor - University of California's Leadership Excellence through Advanced Degrees (UC LEADS)**, *University of California, Berkeley*.

1999 **Team Coach - ME 118/218 Introduction to Mechatronics**, *Stanford University*.

Invited Talks

2016 **"Designing, prototyping, and evaluating milli- and meso-scale multi-legged robots"**, Worcester Polytechnic Institute Graduate Seminar, March 2, 2016.

2014 **"Mesoscale Legged Robots"**, Harvard Microrobotics Laboratory, May 28, 2014.

2013 **"Foldable Hexapods"**, MIT Hexacon, May 04, 2013.

2012 **"Robust, Bio-Inspired, Mesoscale Mobile Robots"**, MIT Structural Biological and Biomimetic Materials Lab, March 19, 2012.

2011 **"'Undersized, Underpowered, and Underactuated - Design, Fabrication, and Control Challenges for Legged Millirobots"**, Yale University GRAB Lab, July 22, 2011.

2011 **"Undersized, Underpowered, and Underactuated - Mobility Challenges for Legged Millirobots"**, iRobot Corporation Research Division, April 1, 2011.

2010 **"Capable Legged Robots at the Milli- and Meso Scales"**, Olin College of Engineering, March 11, 2010.

2008 **"Challenges for Legged Robots at the Milli- and Meso Scales"**, Ecole Polytechnique Fédérale de Lausanne, Oct. 3, 2008.

2008 **"Two Biologically Inspired Millirobots: Flying and Crawling Mechanisms"**, UC Berkeley Integrative Biology Biomechanics Seminar Research Series, April 25, 2008.

2005 **"Rapid Prototyping Using Molding"**, UC Berkeley CS 285 - Procedural Solid Modeling, April 17, 2005.

Workshops

2017 **Win Day One**, *designed by Drs. Jon Stolk and Mark Somerville*, KEEN Winter Conference, Jan. 5, 2017.

2016 **Makerspaces 100**, *1st International Symposium on Academic Makerspaces*, Nov. 13, 2017, MIT.

Advising and Consulting

2016 **Instructor - Making Makerspaces: A summer course on creating academic makerspaces**, *MIT Professional Education*, August 8-10.

2016 **Instructor - Creating and Maintaining Safe and Productive Makerspaces that Matter to Students**, *MIT Professional Education*, March 21-23.

2013 - Present **Technical advisor and mentor to founding team at Dash Robotics, makers of Kamigami Robots**.

Service to Olin College

2016-2017 **College-wide Space Committee**, *member*.

2016-2017 **Weissman Academic Advisory Group (Babson College)**, *member*.

2016-2017 **Strategic Fabrication Committee**, *chair*.

2015-2016 **Strategic Fabrication Committee**, *chair*.
Library Committee, *co-chair*.

2014-2015 **Strategic Fabrication Committee**, *chair*.
Human Powered Vehicles team, *faculty co-advisor*.

2013-2014	**Strategic Fabrication Committee**, *chair*.
	Curriculum Innovation Committee, *member*.
	Human Powered Vehicles team, *faculty co-advisor*.
2012-2013	**Academic Recommendation Board**, *member*.
	Faculty Search Committee, *member*.
	Human Powered Vehicles team, *faculty co-advisor*.
2011-2012	**Committee on Curricular Effectiveness**, *member*.
	Human Powered Vehicles team, *faculty co-advisor*.
2010-2011	**SAE Mini-Baja team**, *faculty advisor*.

Professional Service

2016	**Organizing committee member, 1st International Symposium on Academic Makerspaces (ISAM)**, *Cambridge, MA*.
2016	**Founding member, Higher Education Makerspaces Initiative (HEMI)**.
2010	**Co-chair Animal and Robot Session, IEEE International Conference on Biomedical Robotics and Biomechatronics (BIOROB)**, *Tokyo, Japan*.
2009	**Co-chair Millirobots Session, IEEE International Conference on Intelligent Robots and Systems**, *St. Louis, MO*.
2008	**Co-chair Micro/Nano Robotics Session, IEEE International Conference on Intelligent Robots and Systems**, *Nice, France*.
2006-Present	**Member, IEEE, ASME**.
	Reviewer for *Autonomous Robots*.
	Reviewer for *Mechatronics Forum International Conference*.
	Reviewer for *Biology Letters*.
	Reviewer for *International Journal of Precision Engineering and Manufacturing*.
	Member IEEE Robotics and Automation Society Technical Committee on BioRobotics.
	Reviewer for *IEEE/ASME Transactions on Mechatronics*.
	Reviewer for *IEEE Transactions on Robotics*.
	Reviewer for *Institute of Physics Journal of Micromechanics and Microengineering*.
	Reviewer for *Robotica*.
	Reviewer for *Robotics and Automation Letters*.
	Reviewer for *Bioinspiration and Biomimetics*.

Selected Media Coverage

2016 **Education Newsletter**, *Make:*, Coverage of the first International Symposium on Academic Makerspaces (ISAM).

2016 **"The 4th Industrial Revolution The Maker Movement"**, *Korean Broadcasting System Documentary One*, Olin's Principles of Engineering course is featured.

2016 **'This Device Locks Your Netflix Account Until You Finish Your Workout'**, *BostInno*, Article in BostInno about a final project for ENGR2210 - Principles of Engineering.

2016 **"Olin college students create machine that makes pancakes"**, *Boston Globe*, Article in the Boston Globe about a final project for ENGR2210 - Principles of Engineering.

2012 **"At Olin Students Get a Grasp on Engineering"**, *Needham Times*, Article in the Needham Times about ENGR2330 - Introduction to Mechanical Prototyping final competition in which students compete to design and demonstrate capable robotic hands.

2009 **Catalyst - Robot Biomimicry**, *Australian Broadcasting Corporation*, Television feature on bio-inspired robotics.

2008 **"Robots" podcast**, *Ecole Polytechnique Fédérale de Lausanne*, Jumping and crawling in millirobots.

Grants (funded)

2016 **Olin College Summer Faculty Development Award**, *"Procedural Design Tools for Folded Robots"*, PI, $6,000.

2015 **Kern Engineering Entrepreneurship Network topical grant**, *"Sharing product development processes for entrepreneurial teams that create real value"*, Co-PI with Lawrence Neeley, $39,000.

2015 **Olin Curriculum Innovation Award**, *"Olin Workshop on the Library"*, Co-PI with Jeff Goldenson, $34,600.

2013 **Olin College Innovation Grant**, *"Re-imagining fabrication at Olin"*, PI with Co-PIs Christopher Lee and Lawrence Neeley, $8000.

2012 **National Science Foundation CMMI 1229534**, *"MRI: Acquisition of a Hyper-Frequency Viscoelastic Spectroscopy Instrument for Interdisciplinary Undergraduate Research and Education"*, Co-PI with Chris Lee, Alisha Sarang-Sieminski, Matt Neal, $112,000.

2011 **Olin College Summer Intellectual Vitality Award**, *"A Multi-Touch Force Sensor for Measuring Ground Reaction Forces from Small Robots and Animals"*, PI, $3750.

Fellowships and Awards

2013 **Invited to National Academy of Engineering Frontiers of Engineering Education (FOEE) symposium**.

2009 **1st Place - ASME Student Robot Design Competition**, *"RoACH: An autonomous 2.4g crawling robot"*, IDETC, San Diego, CA.

2009 **Fellow of the Berkeley Summer Institute for Preparing Future Faculty**.

2008 **ICROS Best Application Paper Award Finalist**, *"RoACH: An autonomous 2.4g crawling robot"*, IEEE Conference on Intelligent Robots and Systems, Nice, France.
